## PROFESSIONAL SUMMARY

Motivated and results-oriented mobile app developer with over 2 years of experience in **mobile, web, UI/UX**, and **extensive testing** in **Kotlin, Flutter**, and **JavaScript** with **excellent communication skills**. Currently pursuing a postgraduate program in Mobile Application Development at George Brown College in Toronto. Highly skilled in **programming**, with a strong foundation in **Agile workflows and cross-platform mobile development**. Actively seeking a co-op opportunity (May 2025 - Aug 2025) to leverage my **testing expertise** and contribute to software quality assurance.

## EDUCATIONAL QUALIFICATION

### **Mobile Application Development and Strategy**

*George Brown College, Toronto, ON*

*Sep 2024 – Pursuing*

### **Master of Science in Information Technology**

*Panjab University, India*

*Aug 2021- Jun 2023*

## CORE EXPERIENCES & TECHNOLOGIES

- **Programming Languages:** JavaScript, Kotlin, Java, C#, Dart, Python
- **Framework & Libraries:** Flutter, React, .NET Core, Node.js
- **Web Development:** HTML, CSS3, Typescript, Modern JavaScript
- **Mobile Development:** Android, iOS, Xcode, Android Studio
- **Database Management:** MySQL, Firebase, Microsoft SQL Server
- **Development Tools:** Visual Studio, Git, Postman, Figma, Adobe Illustrator
- **Soft Skills:** Excellent interpersonal, verbal and written communication skills
- **Tools:** MS Office 365 (Word, Excel, PowerPoint)
- **Additional Skills:** Web Services, Agile Methodologies, REST API Development, Version Control(Git)

## FIELD EXPERIENCE & COURSE WORK

### ***Dilluminati Concert Website in JavaScript***

[Github Link](#)

- Designed and implemented an interactive concert website with event details and ticket booking
- Utilized JavaScript for dynamic content updates and user engagement

### ***Food Order Full Stack Website in JavaScript and Node.js***

[Github Link](#)

- Designed an interactive food order full stack website with invoice of order
- Utilized JavaScript for dynamic user engagement and Node.js for apis

**Rental and Landlord App in Kotlin**[Github Link](#)

- Created a mobile application in Kotlin to manage property rentals efficiently
- Features include real-time tenant-landlord communication and rental tracking

**Online Learning Portal in Kotlin**[Github Link](#)

- Developed an app for students to learn from material videos links
- Implemented local storage and record students progression of watchlist
- 

**Food Order App (Flutter)**[Github Link](#)

- Built a mobile app for food ordering with features for menu selection and delivery tracking
- Used Firebase for real-time database and user authentication

**Book Inventory System in Kotlin**

- Developed an app for tracking and managing book inventories for libraries or stores
- Implemented local storage and search functionality for quick access

**Presto Load App in Kotlin**

- Built a backend system for logistics management using Kotlin
- Integrated REST APIs to handle data processing and tracking features

**Cab Booking App (Flutter)**

- Created two distinct apps for cab booking: one for riders and one for drivers
- Implemented features for pick-up/drop-off location selection and ride tracking

**Sizzling Grill Restaurant App (Flutter)**

- Designed a mobile app for Sizzling Grill, offering browsing menu and table reservations
- Integrated online ordering and payment functionality

**Notes Making App (Flutter)**

- Developed a Flutter-based notes application for creating, saving, and deleting notes with an intuitive UI
- Implemented local storage for data persistence and smooth functionality across platforms

**Satrangi Artist E-Commerce Website in WordPress**

- Developed a WordPress-based e-commerce site for selling artist merchandise
- Customized themes and plugins to meet business requirements

**Cab Booking Website in PHP**

- Developed a three-portal cab booking platform for riders, drivers, and car rentals
- Front-end: HTML, CSS, JavaScript; Backend: PHP and MySQL
- Handled both front-end and back-end development for seamless user experience

**Rocky Mountain Technology, India**

*Software Developer*

*Dec 2022 – Jul 2024*

- Developed and maintained scalable mobile applications using Javascript, Kotlin, Flutter, enhancing user engagement by 15%
- Conducted system testing and resolved complex bugs, improving application stability
- Collaborated using Agile methodologies, ensuring timely delivery of high-quality software solutions
- Participated in system testing and resolved complex bugs to improve application stability

**ADDITIONAL INFORMATION**

**Availability:** May 2025 - August 2025 (Co-op Term)

**Interests:** Exploring new technologies, contributing to open-source projects, and developments
